How to add, update or remove a stored credit card?

A stored credit card enables faster check-out and if enabled, the auto-renew feature so that domain names and services can be auto-renewed before expiry.

How to add, update or remove a stored credit card

1. Login to the Account Manager. Under the Pricing & Payment Information section select 'Managed Stored Credit Cards'
2. Choose Add, Update or Remove to modify the stored credit card.If selected Add or update you will be taken the payment gateway to enter the new details.
3. Enter your new card details. Once added successfully you should see the card in the Stored Credit Card list.
4. **Note:** if you add or update a credit card a $1 authorisation will be made to your credit card. This is not a charge, and the authorisation will be removed from your card within 7 days.
