

DNS

I transferred the DNS to another provider, but now I want to switch back and use your services, how do I do this?

You can restore the services with us, provided they haven't expired and been removed. Or if you just want to start using our services, you have to park the domain with 1st Domains. Here's how:

1. Login to the Account Manager and select 'Manage Domains & Services'
2. Select the domain name you wish to manage from the list
3. Click on 'Park Domain Name'
4. Turn the parking status slider to 'On' and approve the confirmation message.
5. You can now return to the domain manager, and configure your services under the links, 'Manage Email Forwarders' and 'Manage DNS Zone Records'.
