

Web hosting

Are sub domains supported under web hosting?

Sorry, our web hosting plan does NOT support sub domains. The web site will be activated for one domain name only for both www and non-www hostname. e.g. www.domain.co.nz and domain.co.nz

Voyager have more advanced web hosting plans that support subdomains: <https://voyager.nz/business/hosting/web-hosting>

Unique solution ID: #1062
