

Web hosting

Do you offer web hosting?

Yes, we do! Our web hosting includes unlimited storage and data, making our plans ideal for small to medium-sized businesses looking to establish an online presence.

We also provide a free SSL certificate that automatically renews for you. Our hosting servers are based in NZ at our dedicated data centers, and we offer malware protection along with one-click cleanup and repair solutions.

Our award-winning web hosting control panel from Plesk gives you full control over your website. The easy-to-use dashboard allows you to manage your website, databases, files, SSL certificates, and much more. You can also install popular applications like WordPress and Joomla from our Applications Catalog.

If you want to install WordPress, we offer a one-click install option as well as a WordPress toolkit to help you manage your website. Read more about our web hosting plans [here](#).
