

Web hosting

How do I add web hosting to my domain?

To add web hosting to a domain you currently have with 1st Domains, you will need to log into your 1st Domains account.

Once on the account manager page, click on "Manage Domains and Services" and check the box next to the domain you want to add hosting to. Please note that you can only add web or email hosting to a domain you own with 1st Domains, and you must be using our name servers as well. If you have any questions regarding this part of the purchase, please contact our support team.

Click the "Choose An Action" button and select "Purchase Services."

Check the box for No Limits Web Hosting, then click Continue.

Verify that the invoice details are correct, then click Continue again. You will be taken to the checkout page. Complete the checkout process and submit your order. The renewal of the web hosting will align with the expiry date of the domain for which it is purchased.

Once the hosting is provisioned, you will find a link to the "Web Hosting Control Panel" under the Services subheading on your Domain Name Manager page for that domain.
